

Dermal Filler & Muscle Relaxing Injections
To make the patient look more refreshed, I have combined Radiesse and Bocouture. I injected Radiesse into the cheek area and Bocouture, a muscle relaxing treatment, in to the frown area and lateral eyebrows. After photo taken at six weeks post treatment.

Abdominoplasty
Abdominoplasty surgery performed on a 34-year-old woman who'd had two children. Surgery included a tummy tuck with muscle tightening and liposculpturing. The after picture was taken three months post op.

Breast Reduction Surgery
Often the areolae are quite stretched in patients with macromastia. Breast reduction surgery is an opportunity to reduce the areolae to a more attractive size.

Dermal Fillers
Joanne had a subtle cheek augmentation with Juvederm Voluma combined with Juvederm Ultra in the nose-to-mouth lines and the corners of the mouth. Soft lip enhancement to eradicate the 'hard look' and muscle relaxants to soften the frown lines and crow's feet.
