## READY FOR AN EYEBROW LIFT?

THE BEST NON-SURGICAL OPTIONS WITHOUT GOING UNDER THE KNIFE

If you look at a photo of yourself in your mid 20's to mid 30's you will notice that the mid temple and cheek area is a lot fuller and more defined. Think of this as the supporting structure (or shelf) of the face. After this time the ageing process and other factors such as weight loss, yo yo dieting, stress and illness all contribute to this area depilating and becoming more hollow in appearance. To address this problem you need to replace what has been lost and this is done by the use of fillers such as hyraolinic acid or calcium derivative fillers which give an immediate result. Once the volume has been restored then consideration for using muscle relaxing injections can be discussed.
