

PERFECT SKIN AND BRANDS YOU CAN TRUST

PERFECT SKIN CHOOSES THE BEST IN DERMAL FILLERS, RESTYLANE AND EMERVEL BRANDS YOU CAN TRUST.

As an experienced nurse consultant when it comes to dermal fillers it is important to choose high quality, well researched products, that provide amazing, long lasting results. I have used the Restylane range for over 12 years and in the last year Emervel. These two wonderful hyaluronic acid fillers allow me to lift, rebalance and enhance the whole of the face, décolletage and backs of hands, basically I have all the tools I need to boost the skin and tackle the most superficial lines to the deeper volumising needs of cheek augmentation and deep nose to mouth lines. These products, in my opinion, give you a natural, youthful freshness.

WANT TO LOOK GREAT, BUT MORE IMPORTANTLY, WE WANT TO FEEL GREAT?

As we age, our skin loses fat, collagen, elastin and hyaluronic acid, which offer facial volume and support. The bony structure and the muscles also lose volume.

Over time, we start to see formation of lines, wrinkles and folds, as well as loss of volume, showing the visible signs of ageing.

The Restylane and Emervel dermal filler gels resemble your body's own hyaluronic acid and are specifically designed to work within the different layers of the skin to replace or restore facial volume and improve the quality and integrity of your skin.

Galderma's complete portfolio of fillers can help revitalise and enhance your facial features for a variety of treatment needs:

- Smoothing away wrinkles and folds around the mouth and nose
- Volumising the lips
- Softening and reducing facial lines across the forehead and around the eyes
- Defining and restoring volume to the cheeks
- Shaping and contouring to remove visible signs of aging

WITH RESTYLANE I FEEL BRAND NEW

Restylane offers a range of flexible, firmer fillers, which boost facial volume and create lift to give you the shape and definition you desire.

With the use of unique and patented NASHA technology, Restylane fillers give you precise and long lasting results.

Restylane is proven in a clinical study to last up to 36 months, with just two maintenance treatments.

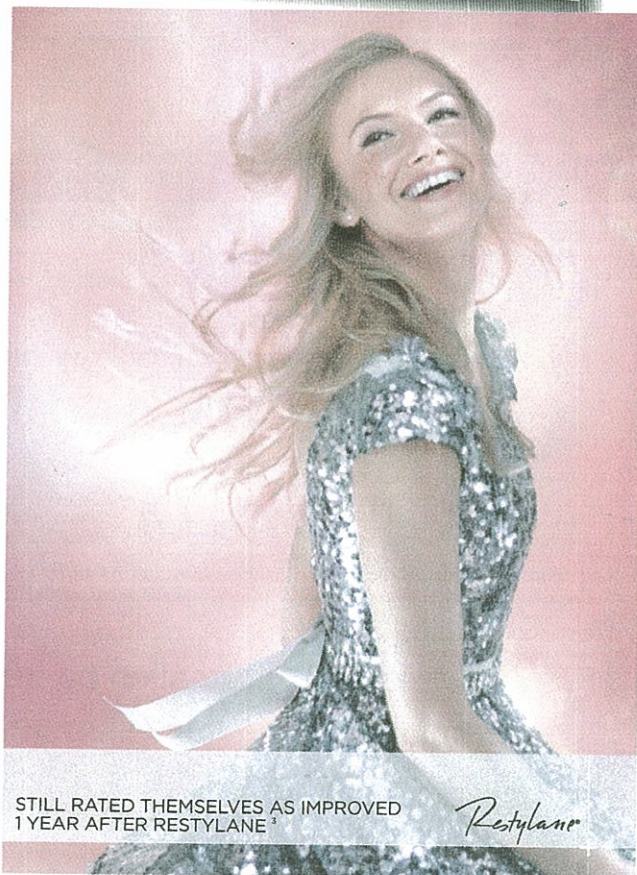

Feel reassured, Restylane fillers are reliable with a heritage built over 16 years of experience, alongside extensive research and over 80 scientific publications.

THE NATURAL WAY TO HAVE DERMAL FILLERS

On a regular basis we see in a newspaper or on the television sensational stories of dermal fillers going wrong or people looking unnatural, or having the puffy pillow faced look. But no-one ever seems to focus on the millions of people who have used, and are regularly using fantastic safe products like Restylane and Emervel.
