

Essex winners' in life changing makeover

The audience gasped and tears fell when the winners of Dream Makeover Essex were revealed at a stunning Gala event held at the Marriott Hotel on Thursday 21st March.

Dream Makeover Essex, is a contest which offered contestants a share of £100,000 for life changing makeovers, including facial aesthetics by Frances Furlong of Perfect Skin (www.perfect-skin.co.uk).

Three winners, chosen from a shortlist of 26, received fabulous top-to-toe treatments including laser eye correction, smile makeover and personal training.

Aesthetics expert Francis helped choose the winners and joined host Jeff Brazier in congratulating the winners who were picked for their personal stories and ability to reap the most rewards from the makeover package.

Francis utilised a combination of products from the Galderma A&C range including Restylane Perlane, and Restylane Lip Volume.

Francis Furlong with Jeff Brazier and Sam Leon, Galderma A&C Product Specialist

Pliaglis® – clean, simple and fast acting

(7% lidocaine & 7% tetracaine)

A clean, simple and fast acting solution for long lasting anaesthesia. Pliaglis is the first and only self-occluding topical anesthetic cream. It contains the highest FDA approved concentration of lidocaine (7%) and tetracaine (7%) in a single product, providing fast and long lasting anaesthesia.

On 14th of March Pliaglis was first introduced to a number of UK aesthetic practitioners. Mr Max Murison, Consultant Plastic Surgeon at Morriston Hospital, Swansea chaired a meeting where our special guest Dr Daniel Galimberti, from Argentina, shared his experience with Pliaglis with a select group of industry experts. They all agreed that adequate pain management has a direct impact on patients' retention and recommendation and consequently

on business revenues. Dr Galimberti was also one of the faculty speakers during the Q-Med Academy Practitioner Meeting on 15th March.

NEW PLIAGLIS IS:

Clean – Drip-free Pliaglis self-occludes even on irregular surfaces when exposed to air creating a pliable peel.

Simple – Easy application and removal technique. Self-occluding properties removes any need for further occlusion.

Fast acting – Peel off after 30 or 60 minute application period for effective anaesthesia.

Pliaglis is supported by extensive clinical evidence performed in various dermatological procedures and has been safety tested across 12 Phase III Clinical Trials. Pliaglis is available through Alliance healthcare, Med-FX, Wigmore and Church pharmacy.

Patients can benefit from Pliaglis prior to a range of common dermatological procedures:

- Non-ablative laser resurfacing
- Laser-assisted hair removal
- Laser leg vein ablation
- Laser treatment of vascular lesions
- Ablative laser resurfacing
- Laser-assisted tattoo removal
- Dermal filler treatment
- Micro-needling
