PLEXR TREATMENT SOFT SURGERY

What is Plexr?

Plexr is a cordless hand operated micro-surgical device that transfers concentrated heat to the treated skin tissue. It uses the difference in voltage between the device and the patient's skin, generating a small electrical arc, similar to a lightening.

Plexr ionises the existing gases in the gap atmosphere (that would be the space between the needle tip and the patient skin) producing plasma.

The small lightening sublimate the fluids contained in the superficial part of the skin, without unwanted heat transmission to the adjacent tissues. Additionally it acts on the superficial layer of the skin preserving the lower layers, which reduces drastically any potential permanent skin damage that could be caused by the misuse of conventional lasers.

Suitable for excessive eyelid skin, non-surgical blepharoplasty, under eye rejuvenation, smoker's lines.

Plexr	£500 per session

INTENSE PULSED LIGHT

This treatment helps to reduce red stressed skin, uneven pigmentation, open pores - the skin also benefits from collagen boost and increased firmness to the skin.

Generally after a patch test 3-5 sessions are required and the timing in between treatments will depend on your specific needs.

TERMS AND CONDITIONS

CANCELLATION POLICY

Whilst we are reluctant to charge for any cancelled or 'no show' appointments, this is having a detrimental impact on our services to clients who are on the cancellation list and who cannot be accommodated due to lack of notice/no notice being given to cancel.

As a result if you fail to provide 24 hours notice to cancel your appointment there will be a £50 charge. If your appointment was a complimentary top up following dermal fillers or muscle relaxing injections you will lose this service. If the £50 charge cannot be paid, one of your treatments may be deducted from your course if applicable.
